ABOUT ME

Hello! My name is Junior, and I am a computer science and design engineering graduate with hands-on experience in full-stack web development, game development, and technical support roles. I am best known for my collaborative skills across teams, being able to leverage my interpersonal skills and programming experience. Currently seeking a software/game development role where I use my scripting, engine-based workflow, and project-lead experience to build diverse applications. I am also available for technical support roles. If you want to take a deeper look at some of my projects, my portfolio website is <https://junior-siguencia.com>

EDUCATION

Wesleyan University, Middletown, CT
Bachelor of Arts, Major: Computer Science / Design Engineering

May 2025

PROFESSIONAL EXPERIENCE & LEADERSHIP

Wesleyan University
Website Developer

September 2024 - May 2025

- **Managed** and reorganized the Wesleyan University website by utilizing **HTML, CSS, and PHP** within Cascade CMS
- **Coordinated** with project managers to implement content changes, redirect rules, and user-friendly navigation to improve **UX** and **SEO**
- **Contributed** to the successful launch of the redesigned Wesleyan site in Spring 2025

Wesleyan University
Course Assistant / IT Support

September 2024 - May 2025

- **Designed** and **deployed** custom **C#** and **Python** scripts and art tools for class use in the Unity and Godot game engines, enhancing student workflow and classroom resources
- **Organized** and **led** classroom and event set-ups, including software installations, version control conflict resolution, file repair, and electrical logistics, ensuring seamless technical operations for the professor, guest lecturers, and 20 students
- **Provided** one-on-one technical support to students, improving overall project productivity and student satisfaction

SEO Tech
Software Developer Intern

July 2023 – August 2023

- **Designed** and **built** a full-stack web application using **Django, HTML, CSS, and JavaScript** - integrating third-party APIs and database functionality to support data storage
- **Presented** the completed web application to program investors, highlighting the website functionality and architecture
- **Completed** over 100 hours of full-stack development coursework—covering both front-end and back-end fundamentals

PROJECTS

ROSA
Lead UX / UI Developer

July 2024 - February 2025

- **Led** the **UX design** process: created mock-ups, wireframes, and an interactive style guide to ensure consistent

behavior and visual language across the interface

- **Built** and **integrated** the UI in the **Flutter SDK for Android**, implementing dynamic responses to user input, transitions/animations, and interaction logic
- **Awarded 1st place** at the Reed College Start Up Lab for demonstrating strong design and technical execution

Kinect-O-Ware
Game Developer / Director

January 2025 – May 2025

- **Developed** a game in **C#** using the Unity game engine and the Microsoft Kinect's capabilities to enable body-tracking as the input method
- **Organized playtesting** and **QA** to validate performance across a diverse user base
- **Created shaders** that can be utilized for several in-game functions to enhance player experience

Kinect LED Mirror
Embedded Systems Developer

November 2024 – December 2024

- **Coded** a custom **C** program to convert captured depth data for LED matrix rendering
- **Constructed** a physical mirror, running on the **Linux OS**, that captures the general outline of the object in front of it
- **Presented** the prototype publicly and held at Wesleyan University's Olin Library
